# Learn CSS

## color

The `color` property sets the color of the text.

```
<h1 style="color:Tomato;">Hello World</h1>
```

Example:

Hello World

[More information at w3schools](#)

## background-color

The `background-color` property sets the background color.

```
<h1 style="background-color:DodgerBlue;">Hello World</h1>
```

Example:

Hello World

[More information at w3schools](#)

## font-size

The `font-size` property sets the font size.

```
<h1 style="font-size:80px;">Hello World</h1>
```

Example:

Hello World

[More information at w3schools](#)

## margin

The `margin` property sets the outer space of an element.

```
<h1 style="margin: 25px">Hello World</h1>
```

Example:

# Hello World

[More information at w3schools](#)

## border

The border property sets the border of an element.

```
<h1 style="border-style: solid">Hello World</h1>
```

Example:

**Hello World**
